

# Master's thesis group

Vesa Närhi

# Vesa Närhi

- topics
  - attention and behavior problems at school
  - school enjoyment
  - school interventions to support attention and behavior
- relates to a group of projects focusing on the topics
- existing datasets, the use of which is very highly suggested (the use other datasets needs to be reasoned)
  - datasets mainly from elementary schools; early education possible
  - all datasets are quantitative, this restricts the methodologies to be used
- the group is suitable for students of
  - special education
  - teacher education
  - early education
- I recommend doing the thesis in pairs
- although this slide is in English, Finnish students - don't hesitate
- the maximum number of thesis in the group is ten
