

Learning, teaching, and professional development in digitally-enhanced environments

The topic of your master thesis can address e.g., one of the following issues:

- Learning, professional development, and expertise in simulator-based training
- Technology stress (Techno Stress)- How to cope with new computer technologies in a healthy manner?
- Learning, interaction, and higher education pedagogy in the era of hybrid instruction
- Multimodal data sources (e.g., eye-tracking and psychophysiological measurements) as a way to understand digitally-enhanced learning, teaching, and professional development

Master thesis seminar (spring 2022)

Professor Raija Hämmäläinen (r.jyu.fi/rv5)

Postdoctoral researcher Joni Lämsä (r.jyu.fi/rJ5)
